

Alex Morgan

Creative Developer & Designer

Based in San Francisco, CA

About

I craft digital experiences that live at the intersection of design and engineering. With 8+ years of experience, I specialize in building immersive web applications, interactive 3D visuals, and design systems that scale.

Currently focused on **creative technology** , **WebGL** , and **human-computer interaction** .

Experience

Senior Frontend Engineer - TechVista Inc.

2021 - Present

Lead development of company's flagship SaaS platform used by 50k+ users.

Architected design system adopted by 4 product teams.

Improved Core Web Vitals by 40% through performance optimization.

Creative Developer - Studio Luminary

2018 - 2021

Built interactive installations and award-winning marketing sites.

Developed custom WebGL shaders and animation tools.

Collaborated with designers to ship pixel-perfect experiences.

Selected Projects

Aether - 3D Data Visualization Platform

An immersive data exploration tool using Three.js and custom GLSL shaders. Featured in *CSS Design Awards* and *Awwwards* .

Prism - Design System

A comprehensive component library with 60+ accessible components, dark mode support, and Figma sync.

Luminary Portfolio - Studio Website

Immersive portfolio site with smooth scrolling, 3D transitions, and interactive project showcases.

Skills

Frontend: React, TypeScript, Next.js, Vue **Creative:** Three.js, WebGL, GLSL, Canvas API **Design:** Figma, Framer, After Effects **Backend:** Node.js, Python, PostgreSQL
